

# Research Participants Needed

Hi everyone,

I am a researcher at IUPUI (<https://shhs.iupui.edu/about/directory/mirehie-mona.html>). I am conducting a study to investigate the experiences of participation in community sport events (either locally or as a tourist) and its impact on overall well-being. I am interested in talking to people who participate in community sport events and those who travel to the events with the participants to support them but do not participate in the events themselves. If you are 18 years or older, participate or have participated repeatedly in community sport events then you can help me collect data for this study in two ways:

- Participate in an interview that takes about one hour, and could be conducted in-person, via Skype, or by phone.
- Spread the word among your friends and acquaintances and encourage them to take part in this study

An interview would be scheduled at a time and a place that is most convenient for you. Your identity and all the information that you provide during the interview would be kept confidential. If you are interested in participating in this study, please contact us by phone: (317) 278-4718 or by E-mail: [mmirehie@iu.edu](mailto:mmirehie@iu.edu)

I look forward to hearing from you.
